EXPERIENCE

Freelance Web Developer | Self-Employed | Remote

May 2026 – Present

- Developed and maintained WordPress websites for various clients including content publishing, page formatting, and plugin configuration.
- Implemented structured data markup on WordPress sites using WP Recipe Maker and RankMath to improve search engine visibility and rich result eligibility.
- Built and deployed full-stack web applications using PHP, Laravel, React, Node.js, and PostgreSQL for personal projects.
- Managed internal linking structures and on-page SEO optimization including meta titles, descriptions, heading hierarchy, and image alt text.
- Handled image optimization and media management across WordPress sites to improve page performance and visual consistency.
- Designed and launched a Webflow website for Bakes by K, a bakery business, handling layout design, content structure, and responsive implementation.
- Built HatcheryManager, a React Native mobile application for batch lifecycle management with offline-first data sync using SQLite and Supabase, developed using AI-assisted workflows with Claude Code and GitHub Copilot.
- Used AI tools including Claude Code and GitHub Copilot to accelerate development workflows and improve code quality across multiple projects.
- Maintained project tracking via spreadsheet-based systems to ensure deliverables were completed accurately and on schedule.

Software Developer | Cybertech Corporation | Mandaue City, PH

September 2024 – May 2026

- Converted Japanese magazine PDFs into structured web articles monthly using a CMS, ensuring accurate HTML and CSS formatting across high-volume production.
- Built a custom character compliance checker to detect and normalize full-width English characters, reducing typographic errors at scale.
- Managed production tracking via spreadsheet covering page numbers, titles, authors, QA URLs, and daily output logs.
- Created OGP images and feature visuals using Adobe Photoshop for social sharing and visual consistency.
- Maintained Japanese-language WordPress websites using a backlog-driven workflow with staging, review, and approval before every deployment.
- Modified legacy PHP template files via FTP to add and remove features without introducing regressions.
- Coordinated with the Japanese content lead for language verification, ensuring zero unapproved live edits.
- Managed product uploads and content updates by accurately transferring data from provided spreadsheets.

IT Intern | Knowles Training Institute | Cebu City, PH

February 2024 – May 2024

- Developed responsive WordPress websites across 35 domains; implemented pages, hyperlinks, and content updates to improve navigation and user experience.
- Designed website layouts in Figma aligned to client specifications and brand guidelines.
- Conducted SEO research, built backlink strategies, and used analytics tools to monitor traffic and user behavior, providing actionable recommendations.

Social Media Manager | RMB | Cebu City, PH

January 2022 – August 2022

- Created content and graphics for Facebook, Instagram, TikTok, and YouTube; managed community engagement and customer service inquiries.
- Monitored and analyzed social media metrics to measure performance and identify growth opportunities.
