EXPERIENCE

Software Developer | Cybertech Corporation | Mandaue City, PH *September 2024 – May 2026*

Digital Magazine PDF-to-Web Conversion (Japanese Client)

- Converted client-provided Japanese magazine PDFs into structured web articles monthly using a company CMS, ensuring accurate HTML/CSS formatting across high-volume page production.
- Managed production tracking via spreadsheet including page number, title, author, publication date, QA URL, and daily output log to maintain schedule and accountability.
- Built a custom character compliance checker to detect and normalize full-width English characters and convert problematic symbols for web-safe encoding, reducing typographic errors at scale.
- Used text comparison tools to verify consistency between Japanese PDF source and web draft, ensuring zero missing or altered content without direct language fluency.
- Created OGP images, feature visuals, and cleaned existing article images using Adobe Photoshop for social sharing and visual consistency.
- Generated 20% paywall preview versions using internal client-provided tools and submitted draft URLs for multi-level review including internal lead and Japanese client approval before publishing.

Multilingual WordPress Maintenance & Controlled Deployment (Japanese Client)

- Maintained Japanese-language WordPress websites using a structured backlog-driven workflow: interpreted tickets, applied all changes in staging, submitted review URLs with time logs, and deployed to production only after explicit approval.
- Modified custom legacy PHP template files via FTP to add and remove features, maintaining layout integrity without introducing regressions in older theme architecture.
- Coordinated with Japanese content lead for language verification before each deployment, ensuring zero unapproved live edits in a strict multilingual governance process.
- Managed product uploads and content updates on client e-commerce websites by accurately transferring data from provided spreadsheets.

IT Intern | Knowles Training Institute | Cebu City, PH

February 2024 – May 2024

- Developed responsive WordPress websites across 35 domains; implemented pages, hyperlinks, and content updates to improve navigation and user experience.
- Designed website layouts in Figma aligned to client specifications and brand guidelines.
- Conducted SEO research, built backlink strategies, and used analytics tools to monitor traffic and user behavior, providing actionable recommendations.

Social Media Manager | RMB | Cebu City, PH

January 2022 – August 2022

- Created content and graphics for Facebook, Instagram, TikTok, and YouTube; managed community engagement and customer service inquiries.
- Monitored and analyzed social media metrics to measure performance and identify growth opportunities.
